Online Consultation & Telemedicine

Dr. Sabin's advanced ent centre offers telemedicine facilities through google meet or whatsapp chat. This service is ideal for patients who are unable to visit the centre on their review date, as well as for individuals working abroad who are planning to consult or undergo surgery in the future.

Patients can also discuss their illness using currently available medical records as part of a second opinion or to gain better clarity about their condition. Teleconsultation helps patients prepare in advance, ensuring better planning and saving valuable time before and after surgery.

Integrated HIS Software

Dr. Sabin's advanced ent centre provides an integrated patient communication HIS software, enabling patients to stay connected with the centre from anywhere in the world. Through this system, patients can communicate directly with the doctor for medical queries related to their illness, treatment, or medications.
